

# A Quick Guide to Access Box Tokens

## STEP 1: LOGIN THE DEVELOPER CONSOLE

If you do not have a box developer account, you can create one using the your CMU email at [developer.box.com](https://developer.box.com). The developer account could access your data and files in the [cmu.app.box.com](https://cmu.app.box.com).

Then, go to [cmu.app.box.com](https://cmu.app.box.com) -> Dev Console

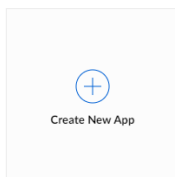

OR, directly go to [cmu.app.box.com/developers/console](https://cmu.app.box.com/developers/console)

## STEP 2: CREATE AN APP

If you do not have an App, create a new one: Create New App -> Custom App -> OAuth 2.0 with JWT (User Authentication) -> [Any Name] -> Create App -> [OPTIONAL: copy the code to your cmd/terminal and try (maybe it does not work, but it's OK)]

My Apps

## STEP 3: GET TOKENS

Login to the [cmu.app.box.com/developers/console](https://cmu.app.box.com/developers/console) -> Click your App -> Configuration -> Client ID / Client Secret / Generate Developer Token
